The story about Valv

Designed by Lukas Dahlén

Inspired by the medieval wall around the small town of Visby, Sweden, the designer noticed the tension between the massive wall and its valve openings. The very shape of the half circle makes the opening in the heavy stone wall possible. Widely used all around the world for centuries the valve shape has become a symbol of a door or an opening in a wall.

The shape of the valve has now taken a decorative and symbolic place in the Valv vitrine to intensify and frame the inside of the cabinet.
